Table figure: less_suitable_model_rejection.csv

Model	Reason tested	Main weakness	Evidence	Deployment concern	Decision
GaussianNB	Fast generative baseline	Conditional independence assumption is un	See baseline/model comparison outputs.	Can underfit complex joint patterns despite	Rejected as final model
kNN	Distance-based nonparametric baseline	Prediction cost scales poorly with data size	See baseline/model comparison outputs.	High latency and memory at million-flow sca	Rejected for deployment
RandomForest	Tree-ensemble candidate final model	Less transparent than a single tree.	See baseline/model comparison outputs.	Manageable with model size controls.	Selected as final model
